Editor: Test Resident, MD (Resident) | Cosigner: Test Attending, MD

Attestation signed by Test Attending, MD at 28/7/2026 11:16 AM

Thanks for your consult. Please see excellent R2 note below.

73F with hx of MRSE BPV IE in the context of an SWI early 2026, followed previously by me!

Now has unfortunately returned with S aureus (presumed MSSA based on PCR testing) bacteremia and likely IE.

Suggest Cefazolin IV (renally-adjusted dosing). Would continue Vancomycin given severity of illness pending formal phenotypic sus (though very likely MSSA).

Suggest repeat blood cultures q48h until clearance.

Sincerely,

Test Attending, MD, FRCPC
Division of Infectious Diseases
The Example Hospital

MEDICATIONS

Medication	Dose	Route	Frequency	Provider	Last Admin
acetaminophen (TYLENOL) tablet 650 mg	650 mg	oral	q4h PRN	Test Nurse, RN	27/7/2026 0600
